USER MANUAL

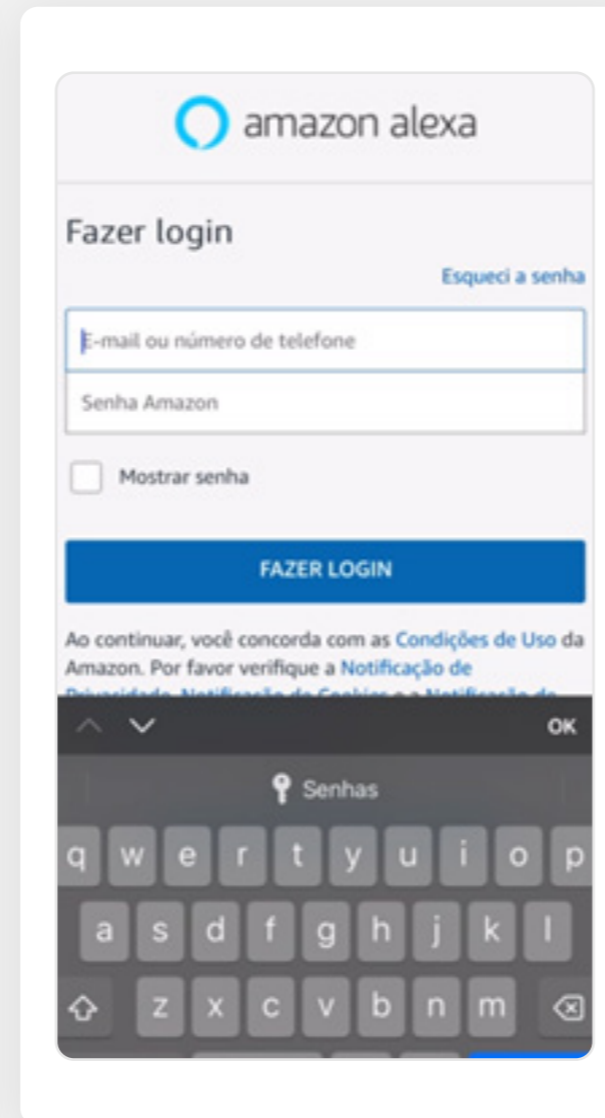

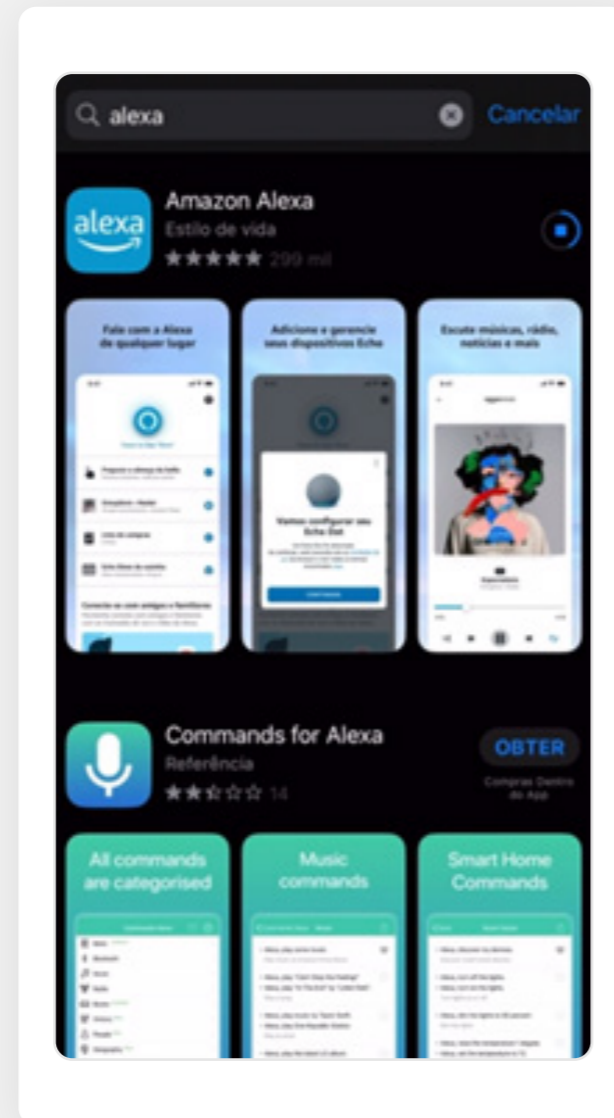

# How to connect the Central Line Smartphone with Alexa

NOTE: When ordering, it must be informed that the product is for communication with Alexa. The Smart Central is the one compatible with communication with Alexa.

## 1st Step

**Download the Alexa app** and sign in with an **Amazon account** (create a new account if you don't have one).

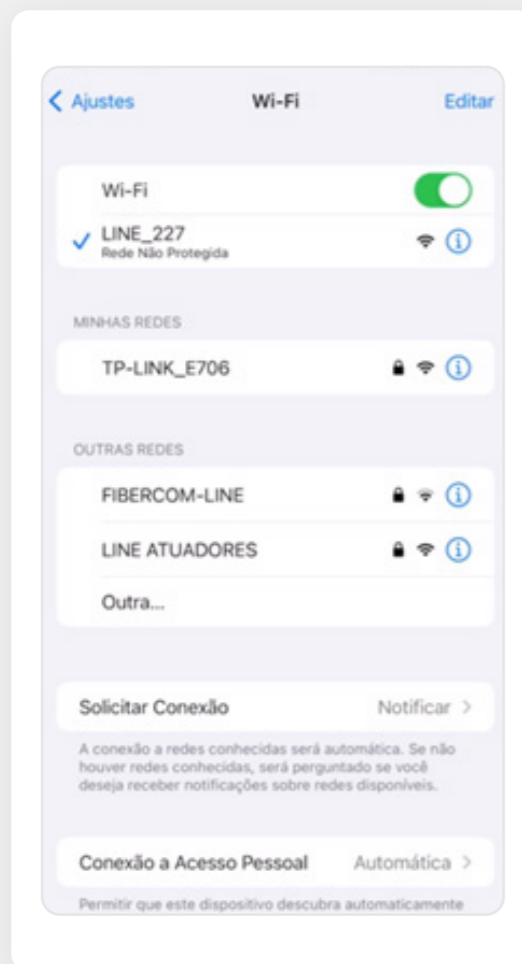

## 2nd Step

Plug the couch in the socket to do the Smart Center configuration.

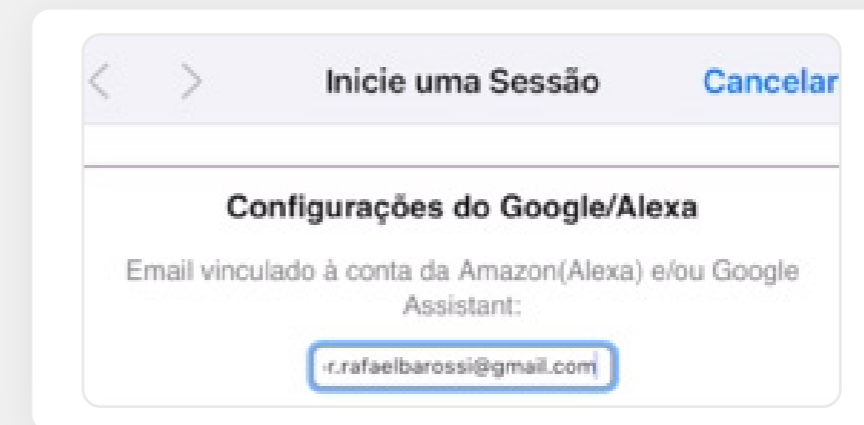

## 3rd Step

Access settings on the smartphone, log into Wi-fi on the network "**Line**". After connecting to Wi-Fi, you will be directed to the configuration page.

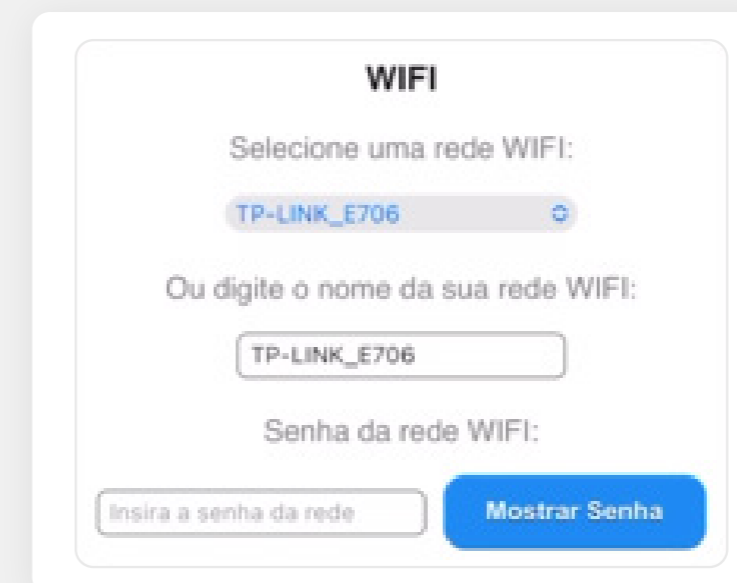

## 4th Step

Insert the **email from Amazon**, the same one used in the Alexa app.

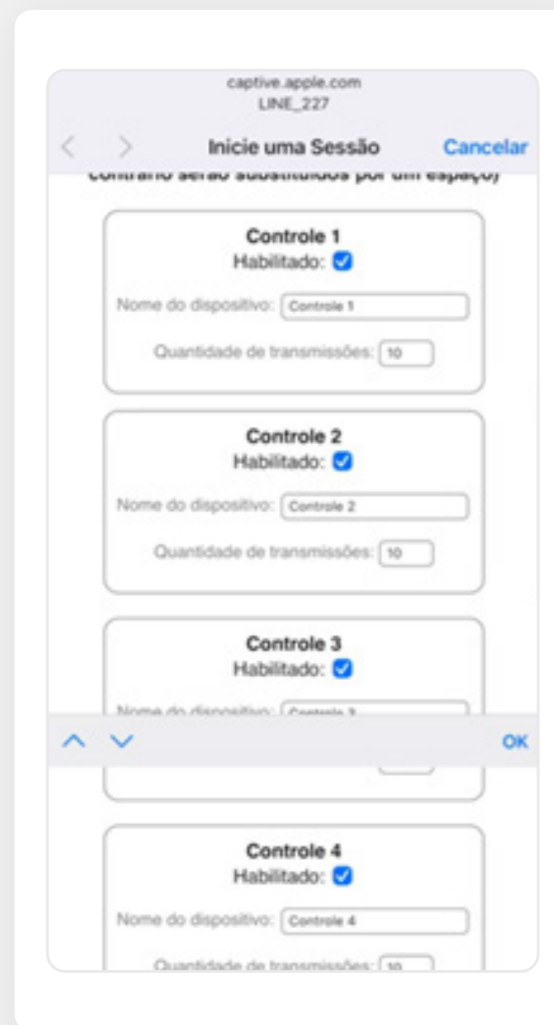

## 5th Step

Select the Internet network and enter the Wi-Fi password. The system is 2.4 networks compatible.

Each control corresponds to each module of the sofa. They need to be all enabled, with the number 10 in the little square.

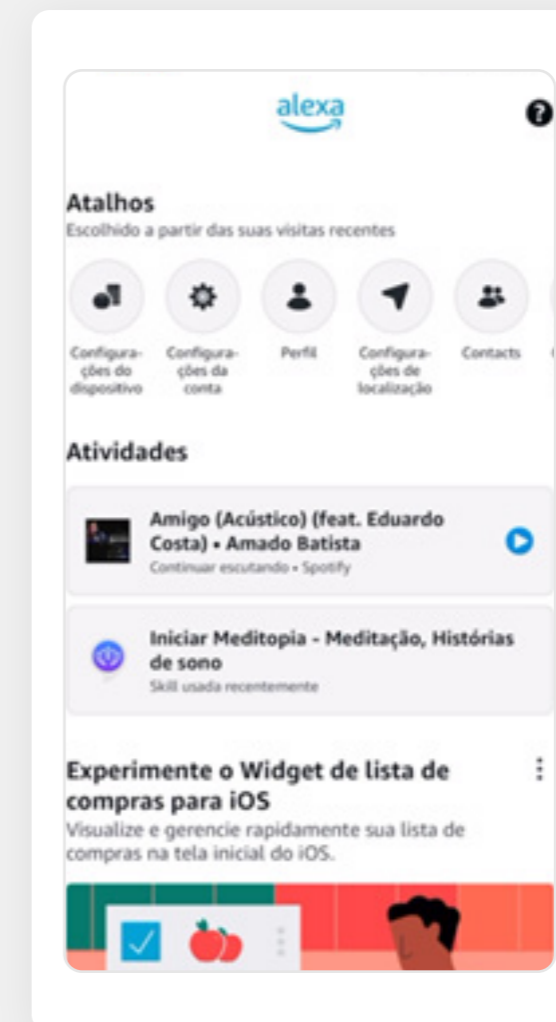

## 6th Step

Save settings.

## 7th Step

Access the "Alexa" app.

## 8th Step

Click on **"more"** and find **"Skills and Games"**

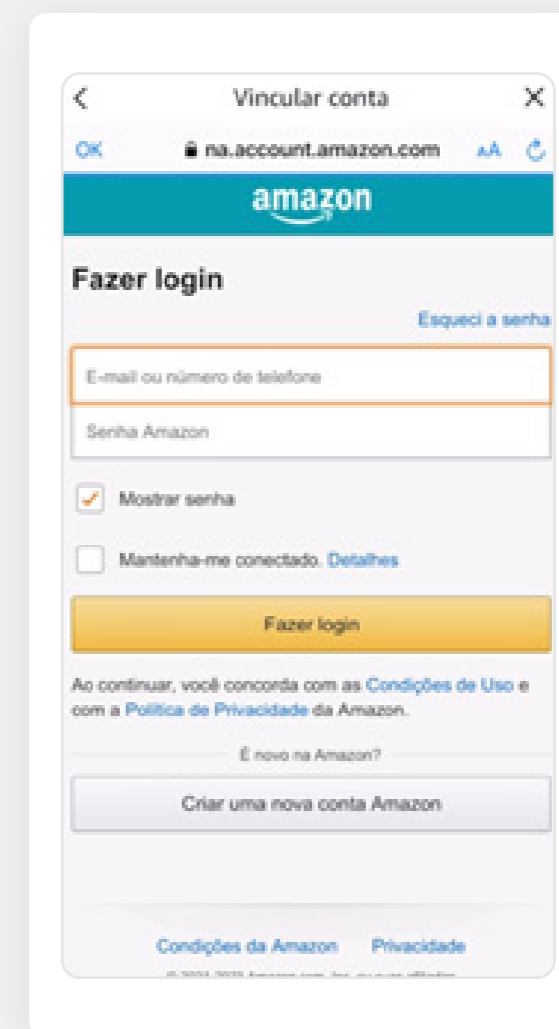

## 9th Step

Click on the **magnifying glass** and type in: **Line SmartHome** and **Activate for Use**.

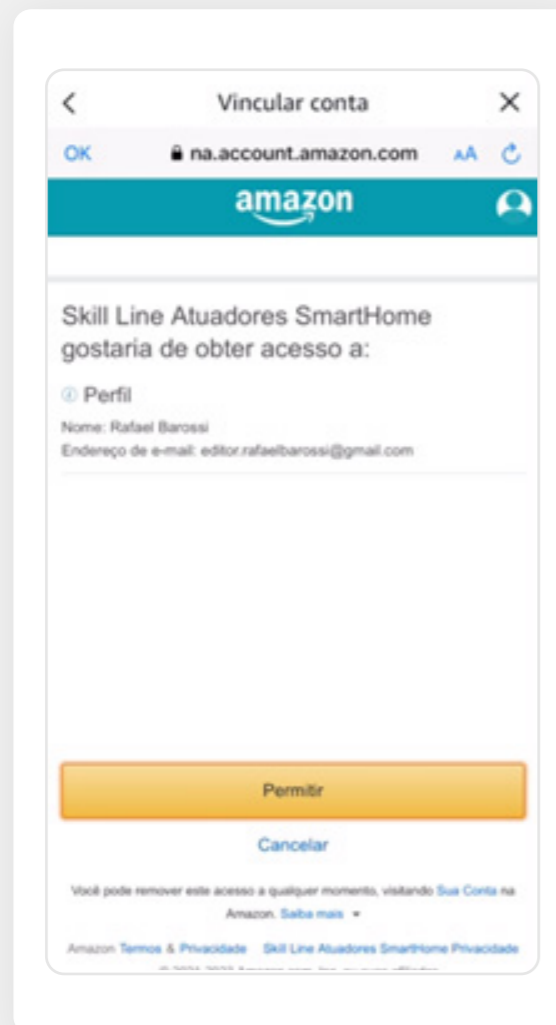

## 10th Step

Re-enter your **Amazon** login and password.

## 11th Step

**Allow** access.

Once linked, you can find the devices **(Central Smart)**.

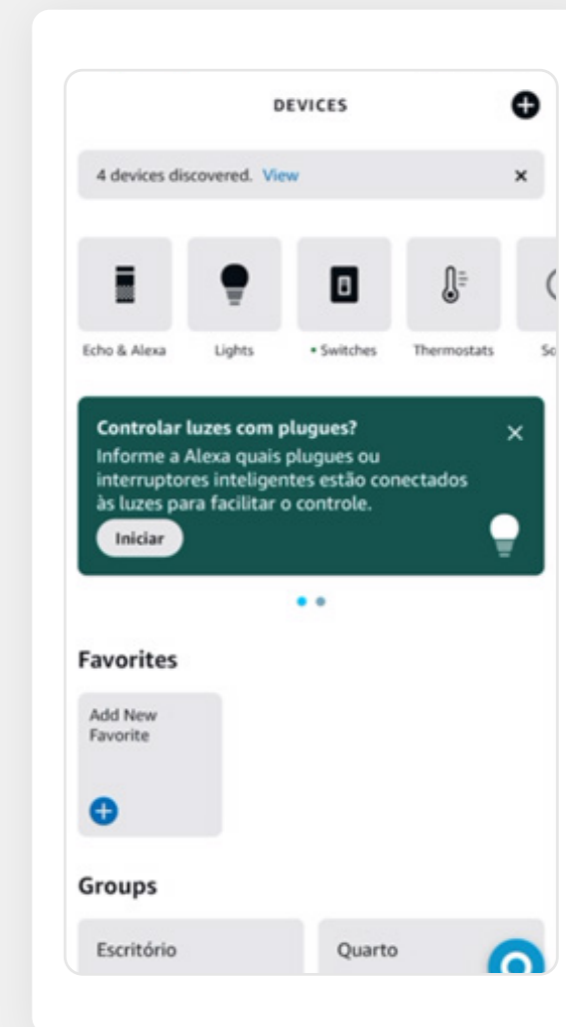

## 12th Step

Open the **"Alexa"** app and go into devices.

## 13th Step

Click on **"more"**. Add devices and click on **"others"**.

## 14th Step

Click on the option: **Does the device not have a corresponding logo?**

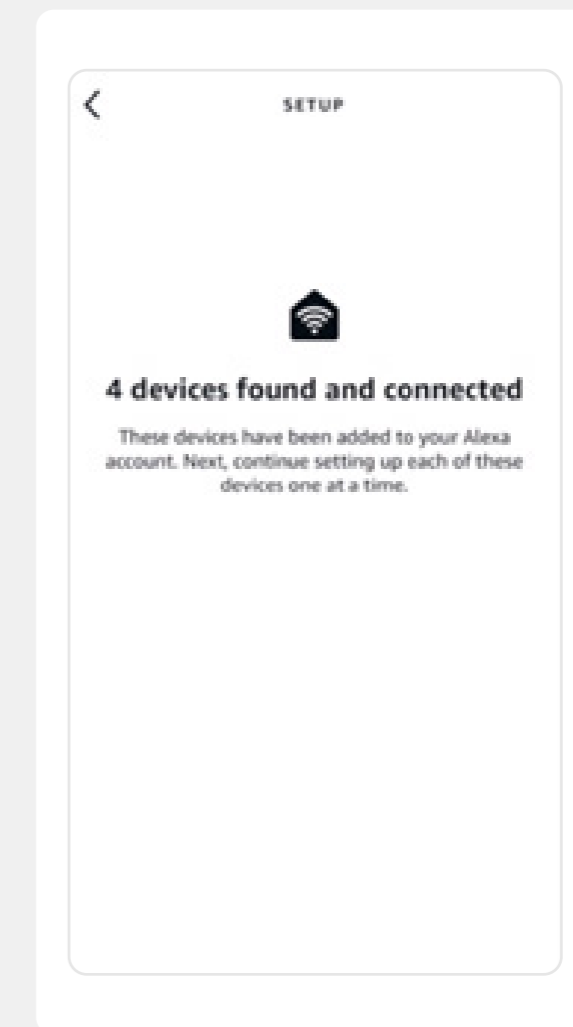

## 15th Step

Click on the option: **Discover Devices**

## 16th Step

Click on the option: **Next.**

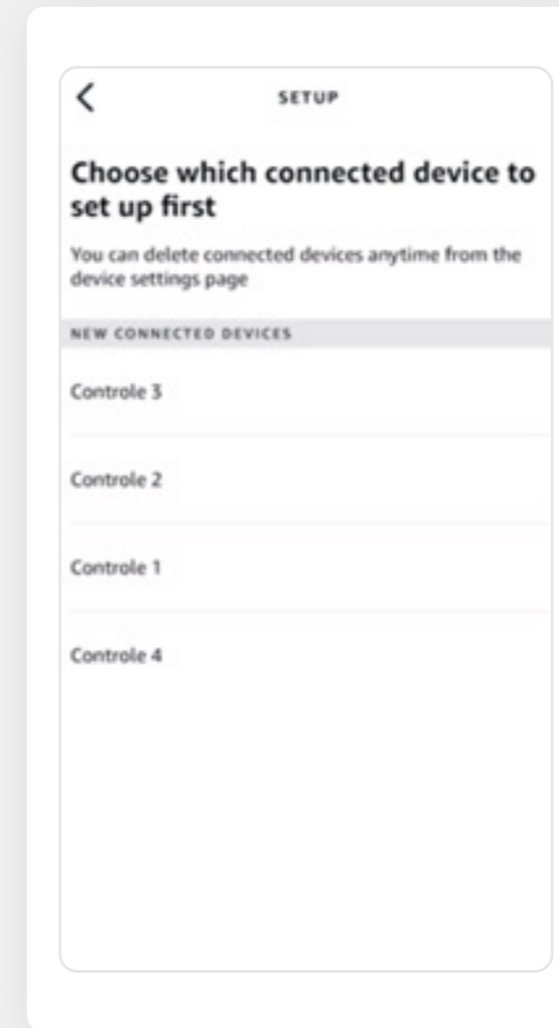

## 17th Step

Each **"Control"** is equivalent to a sofa seat.

To test the devices, you have the original voice commands:

- **On** and **Off**
- **Activate** and **Deactivate**

Example: **"Activate control 1"**

After following all these steps, the mobile already works with the original voice commands, however, you can create any type of command in the routines of **Alexa**.

## Checklist with the main connection errors

**1-** Is the Wi-Fi network working properly?

**2-** Was your Internet password recently changed and you are not aware of it?  
(Confirm password)

**3-** Is Alexa on? Or is it in silent mode?

**4-** Is the e-mail used in Line SmartHome the same as the one registered in Amazon?

**5-** Is the typing of the e-mail correct?

**6-** The Amazon email and password must be the same in all configuration steps.

**7-** Is the password entered correctly? The Internet password must be the same as the one in the modem's configuration.

**8-** Is Line SmartHome Skill enabled to work in the Alexa app?

**9-** Is the sofa plugged in?

**10-** To reset the device, unplug it and leave it unplugged for at least 5 minutes
